To whom it may concern.

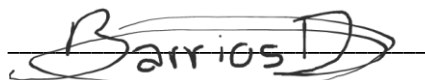

When I think of development, technology and information technology, the first thing that comes to mind is the country of Canada, where important companies in this sector reside, your company is undoubtedly one of them. I am very interested in the published web developer position, since it is precisely my profession for 7 years, I have been working and training to develop my skills and potential to be able to work in a company like yours.

Fortunately, I can say that in recent years I have been trained in the most used and highly demanded technologies for web development, I have a good command of React.js and I have also developed projects in TypeScript, Vue and Angular. Also, I have specialized in the Ionic framework for the development of cross-platform applications, I currently have 4 applications on Google Play, I am a detailed person in my work, that is why I always try to optimize my code so that it is understandable and scalable, and I like to work organized.

He trusted that my passion, talent and skills go hand in hand with the objectives of his company. I am very excited to hear a response from you. I am available for the next stage of recruitment, my address is in Venezuela. In this way, I will be able to carefully express my skills and aptitudes that I am sure meet and exceed your expectations.

Regards,

Bob Barrios
